KEY COMPONENTS

AkoSky Kiss

A lipophilic active derived from fresh organic fenugreek sprouts. Designed to maximize lip volume and reduce the appearance of fine vertical “barcode” lines. Stimulates fat cell activity and lipid accumulation on the perimeter of lips, helping to enhance fullness and improve lip contour definition.

Vitamin F Forte

A rich source of polyunsaturated essential free fatty acids, primarily linoleic acid and linolenic acid, derived from safflower oil in its natural form. It is designed to nurture and protect dry, stressed, or sensitive skin by helping restore and maintain the skin’s natural lipid barrier, which supports moisture retention and reduces dryness.
