KEY COMPONENTS

CutiFine CLR

A natural skin-refining active to improve texture + minimizes the appearance of pores. Targets multiple factors behind pore enlargement. Leaves skin smoother, firmer + soft-focus refined.

Golden C NG

Gold-stabilized ascorbic acid + glutathione. Enhanced stability and bioavailability with luxury. Delivers antioxidant protection. Supports collagen synthesis. Brightens + evens tone. Defends against UV + blue light.

Sensiferm

A ferment-peptide complex of Saccharomyces cerevisiae, oat flour, and calming Palmitoyl Tripeptide-8 that restores the skin's hydrolipidic film. Soothes sensitive, reactive skin, reduces redness, strengthens the barrier, and helps retain hydration for improved elasticity and resilience.

X50[®] Hyalufiller (Precision Cosmetics™ Technology)

A "Cosmetic Drone[®]" delivery system that uses peptides to precisely target fibroblast cells (the cells responsible for producing structural components like collagen and hyaluronic acid). Once it reaches these cells, it stimulates them to produce more hyaluronic acid and elastin, helping improve hydration, density, and wrinkle appearance.
